Awards

'Best Platform for Machine Learning Development'

Is your firm responsible for producing the best platform for machine learning development for the financial sector?

How to Enter:

1. Please complete in not more than 300 words (in a Word or PDF document) why your company is deserving of the award for Best Platform for Machine Learning Development.

2. Complete the online nomination form. Please **don't forget to upload your document.**

3. If you would like to provide material to support your nomination (for example marketing literature and/or an archived online demonstration), these can be provided as links in the Word/PDF document or the files can be uploaded as part of the nomination form. If the files are too large, they can be sent in electronic format to awards@technicalanalyst.co.uk, quoting your company name and the award category in the subject field of each email.

4. If you would like to provide a product trial or live demonstration, please include login details / instructions in the Word/PDF document.

Your nomination entry will be acknowledged within two working days. If you have not received an acknowledgement within five working days, please contact the events team on +44 (0)1483 573150.

Entry Fees:

To enter the Awards there is an administration charge of £95 + VAT for the first category entered. Additional categories are charged at £65 + VAT each. For each entry we need a separate Word/PDF document, a completed online nomination form and, if applicable, any supporting company literature. If you choose not to pay by credit card, an invoice will be emailed to you shortly after receipt of your nomination(s).

Further information

If you require more information about the AI & Data Science Awards and the entry process in general, please contact +44 (0)1483 573150 or email awards@technicalanalyst.co.uk.

NOTE: The Technical Analyst reserves the right to edit or shorten entries where the word count is exceeded. This may impact the strength of the nomination. In addition, the Technical Analyst may decide to change, split or reduce award categories if the number and quality of nominations justifies this measure. The announced voting results are final – The Technical Analyst is not obliged to enter into any discussion regarding the results.
