Awards

'Best AI & Data Science Research for Risk & Regulation'

Have you, your team or your firm been responsible for producing the best AI and data science research for risk and regulation?

How to Enter:

1. Please complete in not more than 300 words (in a Word or PDF document) why you or your company is deserving of the award for Best AI & Data Science Research for Risk & Regulation. Links to online information may be provided within the document.

2. Complete the online nomination form. Please **don't forget to upload your document.**

3. **Upload three examples of your work** as part of the nomination form. If the files are too large, they can be sent in electronic format to awards@technicalanalyst.co.uk, quoting your company name and the award category in the subject field of each email.

4. If you have an online service and want to provide access as part of your entry, please include login details in the Word/PDF document.

You may wish to include some company literature to enhance your entry. This can also be uploaded in the supporting literature section of the nomination form or, if there are any issues, emailed to awards@technicalanalyst.co.uk quoting your company name and the award category in the subject field.

Your nomination entry will be acknowledged within two working days. If you have not received an acknowledgement within five working days, please contact the events team on +44 (0)1483 573150.

Entry Fees:

To enter the Awards there is an administration charge of £95 + VAT for the first category entered. Additional categories are charged at £65 + VAT each. For each entry we need a separate Word/PDF document, a completed online nomination form and, if applicable, any supporting company literature. If you choose not to pay by credit card, an invoice will be emailed to you shortly after receipt of your nomination(s).

Further information
If you require more information about the AI & Data Science Awards and the entry process in general, please contact +44 (0)1483 573150 or email awards@technicalanalyst.co.uk.

NOTE: The Technical Analyst reserves the right to edit or shorten entries where the word count is exceeded. This may impact the strength of the nomination. In addition, the Technical Analyst may decide to change, split or reduce award categories if the number and quality of nominations justifies this measure. The announced voting results are final – The Technical Analyst is not obliged to enter into any discussion regarding the results.
